★★★★★

Nurse practitioner Jennifer had a lot...

Nurse practitioner Jennifer had a lot of knowledge about weight loss. She also had experience with the program herself personally, which made the experience very satisfying.

★★★★★

Almost done with month 2 and down 15...

Almost done with month 2 and down 15 lbs. Honestly didnt think it would work this well. The appetite suppression kicked in pretty quick and I dont have to force myself to eat less anymore it just happens naturally. Shipping was fast both times I ordered and havent had any issues. Glad I gave it a shot!!

BENEFITS

Unlock the Life-Changing Benefits of GLP-1 Medications

These innovative treatments may help regulate appetite, improve blood sugar levels, and support long-term weight management. You may experience real, lasting results with a clinically proven solution designed to enhance your overall well-being.

Significant weight reduction may occur in the first few months.

You may see real results in just a few months.

Improved Cardiometabolic Health

You may strengthen your heart and metabolism.

Better Blood Sugar Control

You may maintain stable and healthy levels.

Enhanced Quality of Life

You may feel better and more energized.

Long-term Weight Maintenance

You may keep the weight off long-term.

Reduction in Appetite

You may reduce cravings and simplify weight loss.

Weight Loss FAQs

What Are GLP-1 Receptor Agonist Medications?

GLP-1 receptor agonist medications work by mimicking the action of the GLP-1 hormone in your body. This hormone helps regulate appetite, reduce hunger, and increase feelings of fullness. Some medications may target both GLP-1 and GIP receptors, which can help regulate different aspects of metabolism. These medications may support weight management efforts when used as part of a comprehensive program that includes diet and exercise.

Note: Compounded medications have not been evaluated by the FDA for safety, effectiveness, or quality. Our program may include FDA-approved medications or compounded formulations based on availability and individual factors.

How do I get started?

Are there any side effects associated with GLP-1 receptor agonist medications?

Medication Options: The TrimRx platform connects you with licensed medical providers who can prescribe medication based on their professional judgment. This may include: • Compounded Medication Program: Our primary program provides access to

compounded medications, which are prepared and shipped by a state-licensed sterile compounding pharmacy. These compounded drugs are not FDA-approved. This means the FDA has not reviewed them for safety, effectiveness, or quality. • Prescriptions for Branded Medications: Alternatively, your provider may write a prescription for an FDA-approved branded medication (e.g., Ozempic®, Wegovy®). TrimRx does not sell, dispense, or ship any branded medications. If you are prescribed a branded medication, you are responsible for filling the prescription at your chosen pharmacy and for all associated costs.No Guarantees: Individual results may vary. Weight loss is not guaranteed and is influenced by many factors, including diet, exercise, and individual biology. The information on this website is for educational purposes only and does not constitute medical advice. Always consult a healthcare professional before starting any new medication or weight loss program.Ozempic®, Wegovy®, Zepbound®, and Mounjaro® are trademarks of their respective owners and are not affiliated with TrimRx.

TrimRx is not a medical practice and the assessment available on the TrimRx website does not create a doctor–patient relationship. Clinical services are provided by third party networks of U.S.-licensed clinicians who determine eligibility for GLP-1 treatment based on medical history and provider assessment. Providers make the final determination as to whether to prescribe any medication. Compounded medications offered by providers accessed through the TrimRx website are produced in FDA-registered facilities but are not FDA-approved and have not been evaluated by the FDA for safety, efficacy, or quality. Results may vary depending on individual adherence, provider guidance, and lifestyle changes. TrimRx does not produce, manufacture, or prescribe any medications, and product appearance may differ from website images. TrimRx associates with certified U.S. pharmacies to ensure high standards of safety and quality. Medication costs are included in the fees collected by TrimRx and TrimRx pays the pharmacies. Unless otherwise noted, results reflect patient experiences related to TrimRx by medical providers, rather than public clinical studies.

User results reflect recent internal statistics from paid orders. Rates may vary based on pharmacy capacity, state regulations, and individual order details. Figures expressed on this website do not represent clinical outcomes or individual results and may change as new information becomes available. Eligibility for medication use or weight loss results are not guaranteed.

TrimRx is not a medical practice or a pharmacy. We do not employ health care providers, nor do we directly provide medication of any kind. Depictions of products on this website do not represent actual products that you will receive. Products will not bear the TrimRx name or logo.
